Value Through Innovation

Teamleader m/w – Pharmacokinetics Programming

Job ID: 4003 8182 BC 01/12 4

Location: Biberach

Division: Medicine

Boehringer Ingelheim Pharma GmbH & Co. KG

Are you seeking a new professional challenge with attractive prospects at a pharmaceutical company which has achieved success at an international level and has been named "best employer" several times?

Are you highly motivated and willing to take responsibility for leading a team of Pharmacokinetics/Pharmacodynamics (PK/PD) programming specialists within Translational Medicine in Biberach?

If so, we can offer you the opportunity to use and advance your professional skills in a demanding field of work.

Your varied tasks

- Provision of successful support for the groups Global Clinical Pharmacokinetics (PK) / Pharmacodynamics (PD) and Global Pharmacometrics (PMx) within our company in accordance with company standards, GCP and ICH quality standards and regulations in the area of programming (SAS)
- Ensurance of the support of all clinical PK/PD and PMx analyses by providing the respective PK/PD or NONMEM datasets across all therapeutic areas and phases of clinical development for clinical PK/PD and PMx groups in Germany, USA and Japan; this includes also the provision of all respective submission relevant datasets to authorities
- Development of programming concepts to be used within global clinical PK/PD and/or global PMx
- Participation in the development of international processes in the area of PK/PD and NONMEM dataset programming as well as leading or participation in international working groups or projects
- Development of short- and long-range plans to increase productivity and quality
- Preparation and maintenance of outsourcing concepts for clinical PK/PD and NONMEM datasets
- Maintenance of good collaboration at the interface to Global Data Management and Statistical Programming

Your ideal qualification

You should have a masters or doctoral degree in mathematics, information systems or information technology.

5 to 6 years experience in dataset programming with SAS in clinical programs with knowledge of clinical PK/PD and NONMEM structures, CDISC datasets and submission requirements are expected. Over and above you should possess continuing education in GCP, ICH and regulatory guidances concerning clinical PK/PD and PMx analyses and analyses data structures.

Personally you are open to new challenges, reliable, flexible in mind and enjoy teamwork. Good organisational and managerial skills, problem-solving abilities as well as good interpersonal skills and excellent leadership competencies are mandatory.

Due to the international nature of the tasks fluency in written and spoken English and German as well as the ability to work successfully in international teams are necessary.

We offer a competitive salary accompanied by a full range of benefits. Biberach is situated in an attractive area of Southern Germany between Ulm and the Lake of Constance.

If you are seeking opportunities to expand your professional horizon and your profile corresponds with the above we look forward to hearing from you.
